## **EASEE-gas updates CBP on the harmonisation of units**

(BRUSSELS, 27 October 2014) EASEE-gas, the European Association for the Streamlining of Energy Exchange – gas, released today a newly updated version of a Common Business Practice (CBP)<sup>1</sup> initially published in 2003:

### **CBP 2003-001/02 on the Harmonisation of Units**

Developed by EASEE-gas Business Process Working Group, this CBP promotes the use of the same units for pressure, energy, volume and calorific value by all organisations involved in the delivery of gas from the producer down to the client.

This CBP was originally published in 2003 and was now updated with the Network Code on Interoperability and Data Exchange Rules.

### **About EASEE-gas:**

*EASEE-gas (European Association for the Streamlining of Energy Exchange - gas) was set up in 2002 in order to develop and promote business practices to simplify and streamline both physical gas transfer and trading across Europe. EASEE-gas presently has 93 full members (companies active in the European gas market) and 30 associate members (industry associations, regulators, government agencies, etc). For more information, please visit [www.easee-gas.eu](http://www.easee-gas.eu) or contact the office in Brussels.*

<sup>1</sup> Common Business Practices (CBPs) are standards, procedures and/or protocols commonly used in the gas industry in Europe. They are recommended by EASEE-gas for adoption by all relevant industry players to simplify and streamline business processes and thereby lead to an efficient and effective European gas market. The development of CBPs is managed by EASEE-gas Executive Committee composed of industry representatives from each part of the gas value chain. For more information please [www.easee-gas.eu/cbps](http://www.easee-gas.eu/cbps).
